

Fathan Akbar Abdurachman

Software Engineer

Bandung, Indonesia; fathan.aa.01@gmail.com; +62 896 9899 4508; fathanaabd.web.app

Professional Summary

With over 3+ years working experience in software products, I successfully delivered various innovations of product development aligned with functional requirements. Proven by streamlining development workflows and significantly improving overall operations.

Work Experiences

PT. Malomo Teknologi Indonesia

Jun 2022 - Aug 2023

Software Engineering

- Developed a web application to monitor environment conditions around avocado yard, acquiring real-time data to visualize it via browser.
- Developed firmware on miniaturized CNC machine to test durability of lipstick after being used several times, allowing to measure the quality by calculating swipe cycle of the lipstick.

PT. Modular Global Teknindo

Nov 2023 - Feb 2026

Electrical Engineering

- Managed a bill of material of electronic requirement for accessories equipment in modular operating theatre, ensuring the costs are within the specified budget.
- Collaborated with R&D department to develop a firmware automation program for the prototype of refrigerant control system to maintain below zero temperature inside the mortuary chamber.
- Designed firmware for pass boxes to implement an interlocking system in modular operating theatres.

PT. Sunrise Purification Technology

Mar 2026 - Jul 2026

Web Developer

- Developed a web application that empowers sales teams to generate accurate cost estimations for cleanroom and surgical room projects, reducing manual calculation time significantly.

Education

STMIK AMIKBANDUNG

Bachelor of Informatic Engineering

3.48 GPA

Technical Skills:

- **Languages:** C/C++, Python
- **Hardware Microcontroller:** ESP32, STM32, Arduino (Atmel)
- **Cloud Services:** Firebase, Google Cloud
- **Engineering Expertise:** Embedded Systems, Firmware Development, Web Application Development with Flask
- **Version Control:** Git, GitHub Actions
- **Coding Practices:** Focus on clean and maintainable code, AI-Assisted Software Development, Agentic approach

Soft Skills & Competencies:

- **Languages:** English (Advanced Proficiency)
- **Cognitive Skills:** Computational Thinking, Critical Problem-Solving
- **Professional Skills:** Effective Workplace Communication, Task Management
